A supplemental restriction requirement was mailed August 29, 2000. Applicants responded with an election on April 12, 2001, and a petition to revive the application, which had unintentionally gone abandoned. Claims 16-20 were previously withdrawn as drawn to a non-elected invention.

Applicant's election of Group I, claims 1-7, 9 and 11-15 in Paper No. 16 is acknowledged.

5 Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

In addition, applicants submitted a response filed on January 15, 2002, electing 12 SEQ ID Nos for prosecution, stating that the election was in response to an office action mailed on October 22, 2001. However, there is no office action of record in the present application having that date,
10 and no supplemental action has been sent, since the action of August 29, 2000.

In view of the recitation of multiple sequences in the claims, the following supplemental restriction requirement is set forth.

Supplemental Restriction

15 Applicants are reminded that nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute **independent and distinct** inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to
20 35 U.S.C. 121 and 37 CFR 1.141 et seq.

In addition to the elected Group I, claims 1-7, 9 and 11-15, Applicant is additionally required to select a single nucleotide sequence and corresponding amino acid sequence for said Group. This requirement is not to be construed as a requirement for an election of species, since each nucleotide and amino acid sequence is not a member of single genus of invention, but
5 constitutes an independent and patentably distinct invention. The claims of the Group elected will be examined to the extent that they read on the elected sequence.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37
10 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37
15 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth F. McElwain whose telephone number is (703) 308-1794. The examiner can normally be reached on Monday through Friday from 8:00 AM to 4:30 PM.
20

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson, can be reached at (703) 306-3218. The fax phone number for this Group is (703) 308-4242. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989).
